

BLANKET ANSWER

Cloverleaf's Blanket Answer is a 100% natural blend of minerals and enzymes designed to clarify water and reduce algae. Safe for use with all pond fish, plants and biological filtration, this formula is an award-winning answer for when other bacteria cultures fail.

Skimmer units, filtration and UV sterilisation don't need to be turned off, and blanket answer will even contribute to filter mediums staying cleaner.

Dosing Calculator:

Pond Size (L)	Weight (g)	# 30mL Scoops
225	18	1/2
445	35	1
890	70	2
1335	110	3
1780	140	5
2225	180	6
2670	210	7
3115	250	8
3560	280	9
4005	320	10
4500	360	11

Multiply for larger doses

For example:

$$10,000L = 2 \times 4500L + 1 \times 445L \\ = 755g \text{ or } 23 \text{ scoops}$$

Application Instructions:

- Mix required dose in with pond water and distribute evenly over water surface. For best results, use in water warmer than 10°C.
- Initially the water will turn milky, and will clear up after 4-7 days, leaving a fine layer of powder on the pond bottom.
- Other pond treatments may be applied after 10 days, and while most users have success on a single treatment, monthly follow up doses can be administered as required.
- Larger doses can be used as needed with no adverse effects.

Safety notice: We advise the use of a face mask and gloves when using aquatic medications and water treatments to avoid any adverse reactions

Available in 800g and 10kg
(suitable for up to 10,000L and
125,000L respectively)
